

Is the UBR3 P-[D/E] motif enriched after the 2A ribosomal skip?

Foreground: 2A downstream products (Rao et al. 2025 combined set) · Background: 17,517 reviewed viral proteins, 8.0 M residues (UniProt Swiss-Prot)

A Removing database redundancy changes the answer

C Unique downstream context vs each background

B Full composition at position 2 — D and E highlighted
